| - starch | g | 0.8 |
| | | |
| Fibre | g | 0.2 |
| Protein | g | 16.0 |
| Salt | g | 1.8 |

Temperature:

Product is blast frozen in a spiral freezer to approximately -11°C. Product is then stored and transported at a minimum temperature of -18°C.
Product temperature < -15°C.

Manufacture

Raw Materials:

- Raw materials are sourced from approved suppliers and checked on receipt against safety and quality standards.
- Frozen meat will undergo “tempering” at a temperature of 0°C to -6°C to facilitate its movement through the mincing and mixing equipment.
- Dry goods will be wrapped until required to protect them from the environment, sources of contamination and potential damage.
- Packaging will be kept free from contamination.

Processing:

1. Tempered frozen meat blocks are manually de-boxed and broken down through a mincer.
2. Meat is batch weighed in accordance with the recipe/specification.
3. Dry goods are manually batch weighed in accordance with the recipe/specification.
4. Minced meat and dry goods are blended and reduced in a mixer grinder to a pre-set sequence and time to ensure that the resulting mixture is of a uniform consistency
5. The mixture is emptied into stainless steel tote bins prior to forming into interleaved portions
6. Portioned burgers are check weighed every hour and then blast frozen.
7. All finished products are check weighed and metal detected to the following tolerances:
 - Ferrous = 2.50mm Non-Ferrous = 2.80mm Stainless Steel = 4.00mm
8. Samples of randomly selected products are cooked to establish end user quality.
